

Gauge Hatch with Lock

Gauge Hatch with Lock – Model Number 510

Product Description

Petrac KTM-CS Model Number 510 is a safety device that has a cover structure that incorporates a pallet/diaphragm combination and that is cooperatively associated with a pressure responsive liquid seal subassembly. The lock system prevents unauthorized access to the storage tank. They are typically mounted to a flange, which connects the vapor space of a storage tank. Gauge hatches can be set to your specifications so that the pallet assemblies in the housings open when specific pressure and vacuum levels are reached.
